

AP Automation UI Kit

The visual language behind the AP Automation portal, written up so a developer can give a new tool the exact same look. Copy the tokens, match the type scale, reuse the components below.

- Light theme
- DM Sans
- Violet → Cyan accent
- Soft-shadow cards
- Tabular numerals

01 Colour

One accent gradient, quiet neutrals, semantic reds/ambers held separate.

BRAND — SPEND BOLDNESS HERE, NOWHERE ELSE

Accent gradient
#7C6BFF → #38BDF8
Hero numbers, primary buttons, active states, logo.

Violet
#7C6BFF
Gradient start, focus rings.

Cyan
#38BDF8
Gradient end, finish-line highlights.

Primary blue
#4C74E2
Flat primary / active / success.

INK & SURFACES

Text
#1B1C2E
Near-navy ink, headings & values.

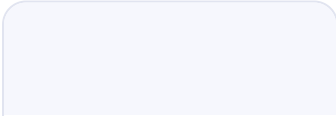

Text dim
#5E6076
Secondary / body copy.

Text muted
#8A8CA0
Captions, eyebrows, placeholders.

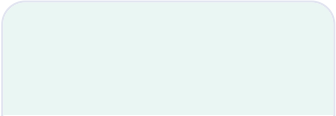

Card
#FFFFFF
Card / panel surface.

Surface
#F6F7FD
Inset fields, tracks, ghost buttons.

Border
#E4E6F2
Hairlines & card edges.

App ground
#D3F1EC→#EFAF8
Turquoise page wash behind cards.

Nav header
#5B84EC
Top bar; tabs one step darker #4C74E2.

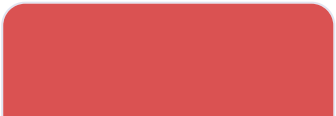

SEMANTIC — STATUS ONLY, NEVER THE ACCENT

Info
#2F6BE0
Informational states.

Warning
#B57A12
Needs attention / partial.

Danger
#DA5252
Failed / rejected / over-limit.

Card hover
#F1F2FB
Row / card hover tint.

02 Typography

DM Sans throughout; a mono face for eyebrows & data.

88.2%

Hero metric

50px · 750 · -0.03em
gradient clip · tabular-nums

Page title

H2 / page

20px · 700 · -0.01em

Section heading

H3 / card

14.5px · 650

Body copy sits at 12.5–13px on dim ink, comfortable for dense finance screens.

Body

12.5–13px · 400 · #5E6076

EYEBROW LABEL

Eyebrow

mono · 10px · 0.14em · upper

N5,240,180 · INV-04821

Data / mono

mono · 600 · tabular-nums

03 Shape & elevation

One card, one soft violet shadow, a small radius scale.

THE CARD

CARD SURFACE

White · 1px #E4E6F2 · radius 16

Shadow 0 1px 2px rgba(30,27,75,.05),
0 10px 28px -16px
rgba(124,107,255,.28)

RADIUS SCALE

5 pills & badges

8 inputs & select

10–11 buttons & toggles

16 cards

20 hero / feature panels

04 Components

Live specimens — exactly how they render in the app.

BUTTONS & CONTROLS

SPLIT / PROGRESS BAR – ACCENT FOR DONE, SEMANTIC FOR THE REST

88.2% auto-cleared · 11.8% need correcting at source

TABLE HEADER

INVOICE #	VENDOR	AMOUNT	STATUS
INV-04821	Dangote Cement	₦5,240,180	Matched
INV-04822	Flour Mills Nig.	₦812,400	Partial

05 House rules

The conventions that keep it consistent.

- light-only

Light theme. Ground is a soft turquoise wash (#D3F1EC → #EFFF8F); content sits on white cards.
- one accent

The violet→cyan gradient is the only brand accent. Semantic red / amber / blue signal state, never decoration.
- numbers

Digit columns use tabular-nums in the mono face. Money is adaptive: ₦850K · ₦5.2M · ₦1.3B, never "₦0.0M".
- punctuation

No em-dashes — hyphens or parentheses. A middot (·) separates inline stats.

copy

Name things by what the user sees, framed honestly — flagged items read **"need correcting at source"**, not "the tool failed".

state

Encode status in **form and colour** — a pill, a dot, a stripe — so what needs attention reads at a glance.

interaction

Interactive things look interactive: hover lifts a card **translateY(-2px)**, transitions 0.12–0.15s.

06 Tokens

Drop-in — the source of truth from the app.

```
/* theme tokens — light */
export const C = {
  bg:      "#F4F5FC", // page base (app wraps a turquoise gradient over it)
  card:    "#FFFFFF",
  cardHover: "#F1F2FB",
  border:  "#E4E6F2",
  accent:  "#4C74E2", // primary / active / success (flat)
  warning: "#B57A12",
  danger:  "#DA5252",
  info:    "#2F6BE0",
  purple:  "#7C6BFF", // brand violet
  text:    "#1B1C2E",
  textDim: "#5E6076",
  textMuted: "#8A8CA0",
  surface: "#F6F7FD",
};

export const GRAD = "linear-gradient(100deg,#7C6BFF 0%,#38BDF8 100%)";
export const VIOLET = "#7C6BFF";
export const CYAN = "#38BDF8";

// card recipe
CARD = { background:C.card, border:`1px solid ${C.border}`, borderRadius:16,
  boxShadow:"0 1px 2px rgba(30,27,75,.05), 0 10px 28px -16px rgba(124,107,255,.28)" };

// nav
header #5B84EC · tabs #4C74E2 · font "DM Sans" (400–800)
```

AP Automation design system · pulled from frontend/src/lib/theme.js and the live component styles. Production font is **DM Sans** (this PDF uses a system-font stand-in). Hand this to whoever builds the new tool.
